

## Cost Savings Case Study

\* Cost savings during first month of usage up to £1680 \*

\* Up to 7 hours of clinician time saved during first month of usage \*

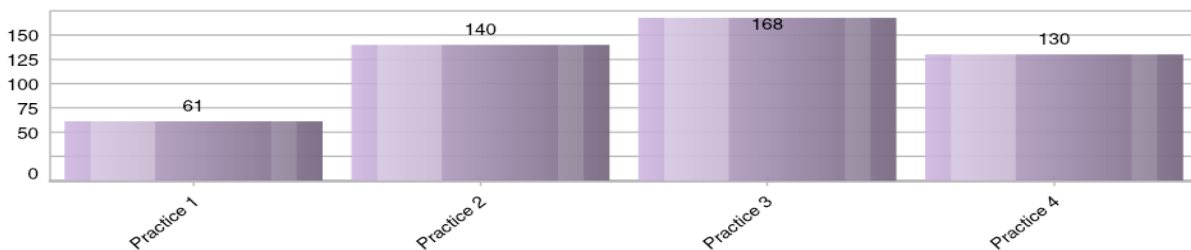

\* Cost savings increase as kiosk is embedded into practice workflow \*

\* Self Health Kiosk Cost £5990 + VAT \*

- Each completed pathway potentially saves £10 for the practice
- Each pathway saves the clinician a minimum of 2.5 minutes per a 10-minute appointment (calculated from actual time patient takes to complete pathway)
- The true cost of a 10-minute GP appointment is estimated by the NHS at £40

The following results show self health kiosk usage during the first month of implementation by a group of four practices in the south-east. We have calculated these costs based on a usage model in which the patient completes a care pathway in the waiting room prior to seeing their GP (in other cases the patient may be asked to complete a care pathway without booking an appointment);

**Total pathways completed per practice 11th Sept - 11th Oct 2019**

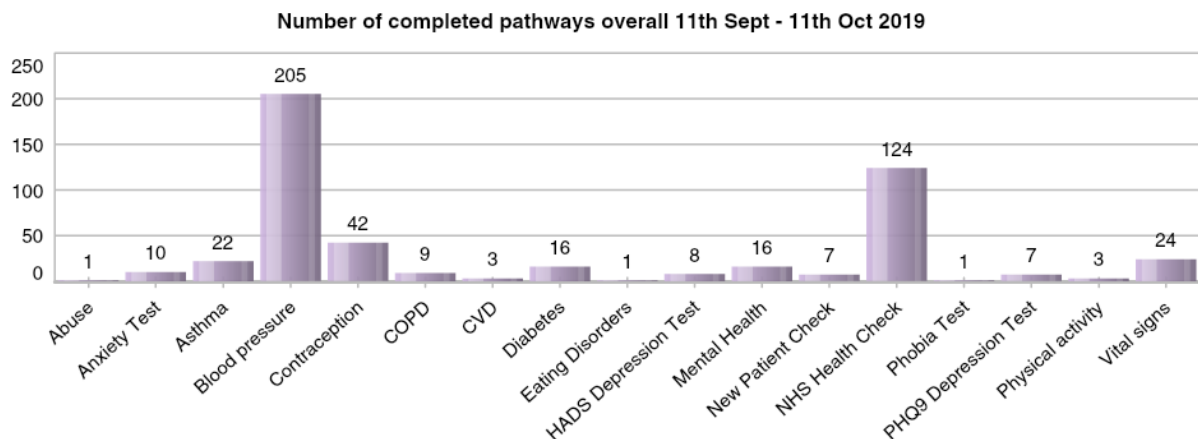

**Costs saved per practice 11th Sept - 11th Oct 2019**

	Practice 3 (High usage)	Practice 1 (Low usage)
Month 1	£1680 saved	£ 610 saved
Month 2	£3360 saved	£1220 saved
Month 3	£5040 saved	£1830 saved
Month 4	<b>KIOSK COST SAVED*</b>	£2440 saved
Month 5		£3050 saved
Month 6		£3660 saved
Month 7		£4270 saved
Month 8		£4880 saved
Month 9		£5490 saved
Month 10		<b>KIOSK COST SAVED*</b>

\*Based on Self Health Kiosk purchase price of £5990 + VAT.

Our range of care pathways have been devised in partnership with clinicians and can be personalised to your surgery requirements.
